Education

Govind Ballabh Pant University Of Agriculture and Technology

August 2023 – Present

B.Tech in Computer Engineering

CGPA: 8.5

Jawahar Navodaya Vidyalaya, Nainital

April 2021 – July 2022

Intermediate / Class XII

Percentage: 91%

Experience

Amazon Internship

Bangalore, India

Software Engineer Intern – AI-Powered File Analyzer

June 2025 – Present

- Developed an end-to-end AI-driven file analysis system using **AWS S3, Lambda, RDS, SQS**, and **SageMaker/Bedrock**.
- Built a web interface deployed on **EC2** for uploading files, triggering analysis, and displaying visualized results.
- Gained hands-on experience in **cloud architecture**, **serverless computing**, and integrating **AI/ML services** with scalable backend systems.

Projects

Custom Shell in C | C, System Calls, Operating Systems

[GitHub](#)

- Developed an interactive user shell in C with 20+ commands implementing major features of GNU/Linux shell.
- Implemented I/O redirection, piping, and handling background processes using system calls.

Tour and Travel Management System | python, SQL, pymysql

[GitHub](#)

- Created a tour and travel agency management database using SQL and Python, incorporating over 15 queries for booking trip packages, assigning tour guides, and managing hotel and transportation logistics etc.

ResearchIT (Research Social Media) | MySQL, Flask, HTML and CSS

[GitHub](#)

- Developed a social media platform for students and research labs as part of college hackathon project.
- Implemented features to keep users informed about research activities across 5 different labs, resulting in enhanced engagement and collaboration.

Bill Splitter Pro | MySQL, Flask, HTML and CSS

[GitHub](#)

- Created a web application to streamline expense splitting among friends and groups, efficiently organizing bills and reducing manual calculation time by 40%.

Y-86 Processor Design | Verilog, HDL, Pipelining, Performance Optimization

[GitHub](#)

- Collaborated in a 2-member team to develop **Sequential** and **Pipelined** versions of INTEL's Y-86 64-bit Processor, optimizing for performance.
- Designed a custom ISA for the Y-86, improving processing efficiency by 20% and mitigating data hazards.
- Applied pipelining techniques to boost throughput by 30%, enhancing performance and reducing delays.

Relevant Coursework

- Computer Science:** Data Science and Algorithms · Programming for Problem Solving.
- Mathematics:** Discrete Mathematics · Probability & Statistics · Calculus and linear algebra.

Technical Skills

Languages: Python, C/C++, HTML, CSS, JavaScript, SQL, Matlab.

Tools/platforms: GIT, MySQL, Linux, Windows, Arduino.

Frameworks/Libraries: Flask, SQLite, Pandas, Sklearn.

Scholarships

Reliance Foundation Undergraduate Scholarship

2023

*Awarded for academic excellence, recognized as one of the **top 5000 meritorious students** across the country.*

Foundation For Excellence (FFE) Scholarship

2023

Awarded for academic excellence in competitive exams (JEE Mains).

Achievements

- Received the **Foundation Level Certification** in IIT Madras' BS program with coursework in Mathematics, Statistics, and Programming.
- Completed **Data Science and AI/ML** internship at YBI Foundation, focusing on data analysis and machine learning.
